FMS Solutions

Hosted Application Services

FMS provides a full suite of back-office applications tailored specifically to the grocery industry. Our outstanding service and support will help you utilize our products to maintain a timely pulse on your business. Our complete suite of applications includes General ledger, (complete with retail inventory module), Accounts Payable, Bill Backs, Accounts Receivable, Payroll, and Human Resources. In addition to our core applications, FMS offers a full suite of management reporting tools within our web portal and an executive dashboard. As an added benefit, FMS provides your company with full data back up through our disaster recovery services giving you complete peace of mind.

Business Process Outsourcing (BPO)

Our skilled staff will provide you “Best in Class” accounting and reporting services to help you better run your business. Our web portal and executive dashboard give you immediate access to all financial data down to electronic invoice images. Our information is there when you need it: daily, weekly or monthly. In addition, we enhance your management reporting and operation through our Benchmarking and Best Practices.

Payroll Services

FMS excels at providing industry-specific payroll services for supermarket operators. Because we know supermarkets, we truly understand your payroll needs. FMS prides itself with superior day-to-day payroll support to ensure your employees are happy. As part of our service, we provide internal and external reporting, along with regulatory tax filings. Our payroll services offer complete software support and time clock integration to reduce cost.

FMS Tax Screening

FMS secures employment-based work opportunity tax credits for its customers, reducing their federal tax bill each year. We have an easy and effective service integrated within our payroll service that takes the burden off of the business owner while maximizing all available federal tax credits. Each year FMS reduces the federal tax liability of our customers by over \$1,000,000.

FMS Best Practices

FMS supports and adds value to its customers through our FMS Best Practices. From over 45 years of exclusive supermarket service, FMS has developed an extensive and comprehensive list of Industry Best Practices available to our customers. With over 50 FMS Best Practices available, these allow an operator to focus on operational improvements from the back office to the front office.

FMS Benchmarking

We excel in providing superior industry benchmarking and support to help our customers maximize their profit within their market. In addition, FMS supports the industry by providing benchmark services for the National Grocers Association and many major wholesalers.

FMS Document Imaging

FMS offers its customers a financial “paperless” business environment. FMS Document Imaging allows a business owner access to all invoices within our integrated financial web portal. Our hosted services store and manage this information safely and securely allowing for improved efficiencies and storage costs.

Labor \$aver

Labor \$aver is a Software as a Service (SaaS) application. It is an all-inclusive time and attendance solution that electronically collects and tracks workforce data and streamlines payroll process. Your ROI will be realized quickly since there is no software to buy or maintain. Our software provides complete transparency into the applications and the database so that you can access employee data wherever it is needed to run your business. Employees can access their schedules, can request time off, and view hours worked.
